Profile

Building my career in software development by applying the fundamentals I've learned through projects, while actively exploring new technologies and sharpening problem solving skills to deliver value and adaptive in real world environments.

Projects

NEWS AGGREGATOR - MOBILE APP

- Engineered a Flutter news app that fetches and renders real-time articles via RESTful API integration, with category-based filtering.
- Implemented multilingual Text-to-Speech for automatic news narration.

PEANUT CANDY SHOP – E COMMERCE

- Architected a full-stack e-commerce platform (MongoDB, Express.js, React.js, Node.js) with product catalog, cart, and order management..
- Implemented user and admin roles with secure authentication and authorization.

E-GROCERY– ECOMMERCE PLATFORM

- Developed a full-stack e-commerce application for a supermarket using the MERN stack.
- Implemented separate roles for customers and supermarket owners.

WE WATCH – WRIST WATCH SHOWCASE

- Immersive product showcase for the WE Watch premium smartwatch, built around a high-fidelity smartwatch mockup for a premium visual presentation.
 - Interactive scroll-based animations using GSAP Scroll Trigger, where the watch dynamically rotates, scales, and repositions as the user scrolls.
